

WASH Training Catalogue

A woman with glasses and a young child are looking at a book together. The woman is pointing at the text in the book. The child is looking at the book with interest. The background is a blue-tinted image of a tent or a similar structure.

unicef 
for every child

2nd Edition
March 2023

For every child

Whoever she is.
Wherever he lives.
Every child deserves a childhood.
A future.
A fair chance.
That's why UNICEF is there.
For each and every child.
Working day in and day out.
In more than 190 countries and territories.
Reaching the hardest to reach.
The furthest from help.
The most excluded.
It's why we stay to the end.
And never give up.

March 2023

Foreword

Aidan Cronin, Ph.D.
Director a.i. Programme Team
WASH and Climate, Energy, Environment,
Disaster Risk Reduction (CEED)

Skilled sector professionals and well-informed policymakers are key ingredients for achieving our mission to bring WASH services to children and families around the world.

Eight years into the SDGs, the world is not on track to achieve SDG targets 6.1 and 6.2 and we know that achieving universal coverage by 2030 will require a quadrupling of current rates of progress in safely managed drinking water services, safely managed sanitation services, and basic hygiene services. UNICEF, together with our partners, recognizes capacity development as one of the core building blocks in attaining the ambitious vision of the sustainable development agenda 2030.

UNICEF continuously strives to be a global recognized leader in Water, Sanitation and Hygiene (WASH), delivering the highest quality, state of the art, and most comprehensive training, and technical assistance programmes to national governments, partners, emergency responders and its own WASH staff globally.

We highly value the talents and capacity of WASH professionals as the core assets to drive our global vision : to realize the human rights to water and sanitation for all and build a diverse, gender equal WASH workforce that taps into the talents of young people around the world.

This training catalogue is an updated of our previous catalogue, with the addition of new training courses, that covers all the major WASH topics, and courses range from the basics and fundamentals, to advanced courses with in-depth subject detail. As change starts with the increased knowledge and capacity of our core professional staff, we look forward to seeing increased uptake of these training courses offered by UNICEF and partners and making WASH an exciting and rewarding career path.

People are at the heart of everything we do in UNICEF. Let us continue our journey to deliver on our shared responsibility to put an end to the WASH crisis, to leave no one behind and to create a water safe world for all children.

UNICEF WASH Trainings

WASH General Courses

Introduction to Water, Sanitation and Hygiene (WASH)

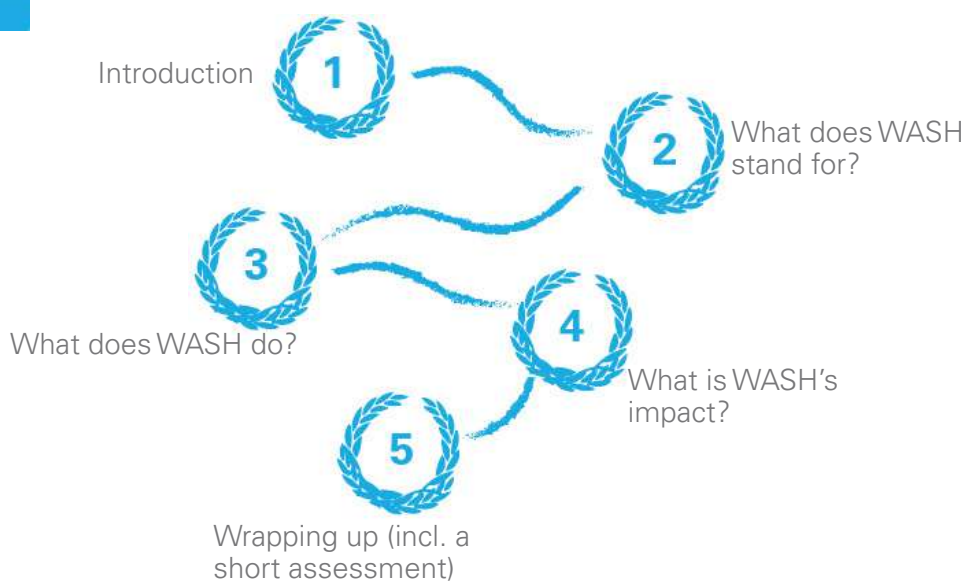

Short E-Course
UNICEF activity

WASH is a key programme area at UNICEF and an important part of the work we do for child survival and development. This course describes what the UNICEF WASH programme does and why it's important

Course Structure

Topic

Water, Sanitation & Hygiene (WASH)

Format:

E-Learning

Provider:

UNICEF

Language:

English

Course Level

Beginner

Audience

UNICEF Staff and Partners

Duration

30 Minutes

Contact

agora@unicef.org

Learning Outcomes

At the end of this course, you will be able to:

- Describe the UNICEF WASH programme
- Explain what WASH does
- Explain the importance and impact of WASH.

WASH Foundational Course

Video
UNICEF activity

Topic

Water, Sanitation & Hygiene (WASH)

Format:

E-Learning

Provider:

UNICEF

apgautam@unicef.org

During 2019 the Foundational Course was introduced in a series of live webinars running from April – November. The course is offered to bring all staff up to a minimum level of understanding on UNICEF’s WASH strategies and programming.

Course Structure

Learning Outcomes

At the end of this course, you will:

- Become conversant with cutting edge issues and UNICEF’s approach in WASH programming;
- Understand where to find knowledge/information resources about UNICEF’s WASH programming;
- Obtain a certification.

Strengthening Enabling Environment for Water, Sanitation and Hygiene

This e-course is a resource and guide for UNICEF staff working towards strengthening the enabling environment for Water, Sanitation and Hygiene (WASH). It will familiarize UNICEF WASH staff with existing approaches, processes, tools, resources, new thinking and innovative mechanisms for strengthening the enabling environment for WASH service delivery

Course Structure

Topic

Focus areas, Water, Sanitation & Hygiene (WASH)

Introduction to WASH
Enabling Environment

1

Sector Policy and
Strategy

2

Institutional
Arrangements

3

Sector Planning

4

Sector Budgeting
and Financing

6

Sector Monitoring,
Evaluation, and Learning

5

7

Sector Capacity
Development

Learning Outcomes

By the end of this e-course, you will be able to articulate:

- What is an enabling environment for WASH service delivery?
- What is the Framework and Theory of Change?
- What are the governance functions that support enabling environment strengthening?
- What is the support process for strengthening enabling environment for WASH service delivery?

WASH Bottleneck Analysis Tool (WASH-BAT)

The WASH BAT is an online tool to support the WASH sector to reach its sustainable development goal (SDG) targets by identifying the bottlenecks to sector progress, and enabling costed and prioritized sector plans to achieve the SDG targets on WASH.

Course Structure

Topic
WASH

Format:
Blended- E-Learning / Face-to-Face

Provider:
UNICEF

Languages:

ghutton@unicef.org

What is WASH Bottleneck Analysis and the WASH BAT?

How is the WASH BAT implemented?

What are the functions and features of the online tool?

Learning Outcomes

By the end of this e-course, you will be able to:

- Articulate the complex interplay of institutional structures and processes that determine how effectively human, material and financial inputs are turned into sustainable access to drinking-water supply and sanitation.
- Understand how to prepare for conducting a WASH bottleneck analysis using the WASH BAT as well as how to implement a workshop and the workshop recommendations.

Gender-Responsive Programming on Water, Sanitation and Hygiene (WASH) Playlist

Gender equality WASH programming: Learn why it matters and the three stages of the results-based management approach to achieving it. This learning playlist has an introductory course plus one course per phase: strategic planning (situation analysis and program design), implementation and monitoring & evaluation (M&E).

Course Structure

Gender Equality in WASH Programming

Gender in Implementation

Learning Outcomes

By the end of this e-course, you will be able to:

- Describe why gender equality matters in WASH;
- Use a gender analysis framework to identify gender-related WASH barriers and bottlenecks;
- Collect different types of data (quantitative and qualitative) to uncover gender disparities;
- Implement gender-responsive WASH programmes;
- Explain how intersectionality works in practice.

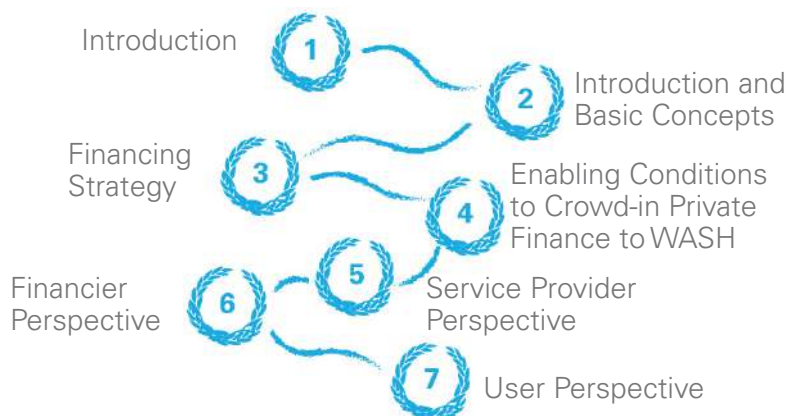

WASH Financing Course

Advanced E-Course
UNICEF activity

The overall goal of the course is to provide a learning space for staff to deepen their understanding of financing concepts and how they are related to WASH sector goals, to strengthen their capacity with knowledge and skills to engage with partners and to leverage public funds and private finance for the WASH sector.

Course Structure

Topic

WASH, Financing/Costing

Format:

E-Learning

Provider:

UNICEF

Languages:

English

Course Level

Intermediate

Audience

UNICEF Staff

Duration

12 hours

Contact

ghutton@unicef.org

Learning Outcomes

By the end of this course, you will be able to:

- Identify WASH funding and financing challenges and potential solutions;
- Utilize analytical tools to decide on the most viable and suitable financing options in both rural and urban settings;
- Advocate for WASH funding and financing at national and subnational level.

These 4 webinars were rolled in September 2020, presented by NY HQ WASH Senior Advisor Guy Hutton, Ph.D and soon will be available in Agora.

Session details:

- Session 1: "Why WASH? Linking PF4C with Toilets, Pumps and Pipes";
- Session 2: "Glimpse at Macro and Micro Level";
- Session 3: "Growing Fiscal Space for WASH: Public Budgeting Cycle and Public Expenditure Analysis for WASH";
- Session 4: "Full Cost Recovery: Sector specific Life Cycle Costs Analysis and Systems Approach".

Forthcoming!

- We are very happy and excited to announce that WASH Public Financing for Children training is being developed on Agora platform and soon will be available to all UNICEF staff who wants to learn more about the subject and develop unique and effective skills.
- Stay tuned and we will release further information soon!

Water, sanitation and hygiene system strengthening: The basics

- This training have been co-developed by UNICEF and IRC (and in some cases SIWI and others);
- They are of strategic importance in the capacity building for the roll out of UNICEF offices in the roll out of the Systems Strengthening Result Area (often termed 'Result Area 2') of the new UNICEF 2022-25 Strategic Plan;
- Session 3: "Growing Fiscal Space for WASH: Public Budgeting Cycle and Public Expenditure Analysis for WASH";
- The course content is currently under review by UNICEF prior to final roll out.

1 Global Sector Status Update and Overview of the New WASH Strategic Plan 2022-25

3 WASH in Institutions (Schools and Healthcare Facilities)

6 Climate, Environment, Energy & Disaster Risk Reduction (CEED)

7 WASH System Strengthening and Financing

2 Water, Climate Resilience and Water Security

4 WASH in Emergencies and Triple Nexus

5 Sanitation & Hygiene, Menstrual Health and Hygiene

8 Monitoring and Sustainability

9 Enablers and Change Strategies

Learning Outcomes

By the end of this course, you will be able to:

- Understand the global WASH landscape and how UNICEF is working to meet SDG6 targets;
- Understand UNICEF's Water Programming and how it is geared to achieving the 6.1 target;
- Understand UNICEF's WASH in Institutions Programming and how it supports progress towards SDG 6 and related SDGs;
- Reach the course page for more outcomes.

Public Finance for Children Online Course

Advanced E-Course
UNICEF activity

This course focuses on UNICEF's approach to public finance, and how UNICEF staff can influence and support the mobilization, allocation, and use of public financial resources to improve the adequacy, efficiency, and equity of public investments in children, and thus, ensure the right of every child to essential social services.

Learning Outcomes

At the end of this course, you will be able to:

- Interpret key financing concepts heard or read in policy or political discourses or processes;
- Identify PFM-related barriers to child results in a sector or cross- sectorally;
- Understand the link between the realization of child rights and optimal use of public resources;
- Reach the course page for more outcomes.

Borehole Drilling - Planning, Contracting & Management

The course is based on the UNICEF tool kit for Borehole Drilling – Planning, Contracting & Management and will help you follow the logical sequence of a project’s life for the planning, contracting, and management of a borehole drilling project, using case studies and lessons learned from colleagues from the WASH programme to better understand the processes, challenges, and risks associated with borehole drilling.

Principles for Planning, Contracting and the Management of Borehole Drilling Projects

Procurement Considerations for Borehole Drilling Works.

Borehole Siting and Drilling Supervision Consultancy

Terms of Reference for Borehole Drilling Works and Pump Supply and Installation.

Learning Outcomes

By the end of this e-course, you will be able to:

- Define the life of a borehole drilling project;
- Describe UNICEF's procurement practices and recommendations on processes, evaluation criteria, contract provisions, generic bill of quantities, terms of reference and contractual approaches;
- Draw upon technical services for siting of boreholes, borehole construction and supervision of construction works;
- Identify risks, forecast challenges and follow a strategy to address them.

Planning Construction and Infrastructure Projects

This course aims to provide UNICEF staff with foundational knowledge on planning a sound strategy for implementing construction and infrastructure projects aligned with the new construction procedures and guidelines.

The content of this e-learning course applies to all construction and rehabilitation projects, whether direct or indirect implementation modality is used.

Programme Planning

Planning for construction

Key aspects for construction planning

Quiz

Learning Outcomes

By the end of this course, you will be able to:

- Identify the Programme Planning Process and key considerations prior to involvement in construction;
- Describe the planning stage in the construction workflow;
- Identify common challenges associated with poor planning, and the roles & responsibilities of UNICEF Programme, Supply Section and in-house technical expertise.

Implementation of construction activities through CSOs

This on-line course is one of the construction and infrastructure modular trainings. The course aims to provide UNICEF staff and Civil Society Organizations working with UNICEF with foundational knowledge on undertaking construction activities as part of UNICEF's programme intervention through partnership with CSOs following UNICEF Procedure for Country and Regional Office CSO Implementing Partnerships.

Construction in UNICEF and implementation modalities

Partnership with CSOs to implement construction activities

Designing and formalizing relationship with CSOs

Implementation and monitoring of programme intervention including construction activity

Learning Outcomes

By the end of this course, you will be able to:

- Identify the key considerations for determining the modalities for engaging CSOs to implement construction activities;
- Describe the roles and responsibilities of UNICEF staff and CSOs to plan and implement construction activities through partnership arrangement;
- Identify the key technical requirements to implement construction activities through partnership arrangement with CSO.

Water and Environment

WASH Climate Resilience Instructor-led Online Course

This course aims to provide an introduction on how to effectively design and implement WASH climate resilience programming. It will offer participants an introduction to the main principles and concepts of WASH climate resilient development.

Course Structure

WASH Climate Resilience and the GWP

Risk assessments for WASH

Identifying and Appraising options

Delivering Solutions & Monitoring and moving forward

Climate Financing applied to WASH

Topic

Climate Resilience

Format:

E-Learning

Provider:

UNICEF and GWP

Learning Outcomes

By the end of this course you will be able to:

- Explain how access to hand hygiene improves outcomes for children;
- Describe UNICEF's market-shaping/strengthening approach for hand hygiene products;
- Recognize UNICEF's five-step process for engaging in hand hygiene markets;
- Assess strengths, opportunities, and gaps in hand hygiene markets in their country context;
- Reach the course page for more outcomes.

Taking action to achieve inclusive WASH

Online Courses
UNICEF activity

Making water, sanitation and hygiene services available to everyone is at the heart of the Sustainable Development Goals agenda, yet we are not on track to meet the SDG 6 goals. To accelerate progress, it is urgent to understand and tackle the barriers that prevent vulnerable groups, including persons with disabilities, from accessing WASH services and contributing to the development process.

Course Structure

1 Introduction to disability-inclusive WASH

2 Meaningful participation of persons with disabilities

3 Identifying and tackling barriers

4 Accessibility to WASH services and products

5 Disability data collection, monitoring and reporting

6 Empowerment, capacity-building and partnerships

7 Reflecting and taking actions

Humanitarian reform, coordination functions and benefit of coordination for the partners

Coordination outputs across the Humanitarian Program Cycle

Operational briefing

Learning Outcomes

By the end of this course, you will be able to:

- Have an overall and individual WASH response outcomes improvement.
- Focus on presenting cluster's objective and outputs, and inform partners about the inputs they are expected to provide.

Global WASH Cluster Information Management Training

The course aims at providing current or future Humanitarian WASH information managers with operational tools and competencies to perform all tasks related to information management to support the coordination functions at national or sub-national level in protracted and/or sudden emergency settings.

Course Structure

Learning Outcomes

By the end of this course, you will be able to:

- Understand the importance of hand hygiene to prevent disease;
- Know the standard precautions;
- Describe the COVID-19 virus and list 2 means of transmission;
- Describe transmission-based precautions, why and when they are used.

New WASH in Emergencies

The WASH Operational Coordination and Leadership Training

The objective of the clusters is to ensure a well-coordinated, strategic, adequate, coherent and effective response. In order to properly carry out their mandate, WASH Cluster Coordinators, Information Management Officers and Evaluation Specialists must have both theoretical and practical knowledge of the leadership skill set as well as the basic coordination functions and standard tools developed globally to support the implementation of the Core Functions.

WASH in Schools

101

The course is designed by the Center for Global Safe WASH at Emory University in collaboration with UNICEF to assist program managers, implementers, and policymakers in executing and sustaining WASH in Schools programs in partnership with local, sub-national, and national stakeholders.

Course Structure

Topic

Water, Sanitation & Hygiene (WASH), WASH in Institutions

Format:

E-Learning

Provider:

UNICEF, EMORY and CGSW

Languages:

English

Course Level

All levels

Audience

UNICEF Staff and partners

Contact

washinschools@emory.edu

Learning Outcomes

By the end of this course, you will be able to:

- Assess the situation in existing schools to identify the extent to which those schools meet WASH standards and targets;
- Choose appropriate 'software' and 'hardware' components of a WASH in Schools program;
- Prepare and implement comprehensive and realistic plans to monitor and evaluate WASH in Schools programs.

**Other Trainings
Relevant to WASH**

Public Finance for Children

The course covers the results chain from the design of child-related policies to the achievement of outcomes for children. The results chain reviews how children policies are translated into sector plans and then budget allocations, to explain how these transform into actual expenditure to achieve sector outputs, and ultimately outcomes for children. The sector perspectives then are framed within the overall PFM system and budget process within which the sectors operate.

Topic

Phase 1-
E-Learning

Phase 2- 5-day
face-to-face
workshop

Learning Outcomes

By the end of the course, participants will be able to:

- Interpret and apply key concepts;
- Connect dots to detect signs of budget or PFM related constraints to results for children in a sector or cross-sectorally;
- Map key actors/powers and partners for effective leveraging and influencing;
- Design ToR to further investigate PFM problems and identify solutions.

System Strengthening for Sustainable WASH

The main objective is to increase the sustainability of water and sanitation services. For instance, this is done through more articulated inclusion of WASH governance and accountability aspects in UNICEF country level programming. Moreover, it helps raising awareness of the importance of investing in sustainability from the outset of programming.

Simulation Exercise

Frequently Asked Questions (FAQs)

Evaluation and Certificate

Learning Outcomes

By the end of this pack, you will be able to:

- Understand how gender equality has been reflected in the CCCs and in UNICEF's approach to humanitarian action;
- Distinguish between gender-specific standalone commitments and integration of gender across sectors;
- Practice how to engage with local organizations.

Engaged and Heard! UNICEF Training on Adolescent Participation and Civic Engagement

This course contributes to building your capacity to promote, design and implement at-scale programming for meaningful adolescent participation and civic engagement. The course provides you with learning on the rational and conceptual underpinning of adolescent participation, the five key strategies and their interventions, as well as organizational processes required to support it. The course is based on UNICEF's Guidelines for Adolescent Participation and Civic Engagement.

Course Structure

Topic

Focus areas, Children and Youth, Adolescent

Format:

E-Learning

Provider:

UNICEF

Language:

English

Course Level

Beginner

Audience

UNICEF Staff and Partners

Duration

140 minutes

Part I with 6 modules

Part II with 6 modules

Learning Outcomes

By the end of this pack, you will be able to:

- Describe the rationale and conceptual underpinning for adolescent participation and civic engagement;
- Understand and apply the five strategies and their key interventions for adolescent participation and civic engagement;
- Explain the organisational processes and commitments;
- Summarize how adolescent participation can be integrated in each stage of the programme cycle and in UNICEF programme planning processes.

Introduction to UNICEF Core Commitments for Children in Humanitarian Action

Short E-Course
UNICEF activity

This course has been designed to help you develop your understanding of the revised Core Commitments for Children (CCCs) and how to use them in an emergency response.

Course Structure

Topic

Focus areas, Humanitarian Action, Preparedness

Format:

E-Learning

Provider:

UNICEF

Language:

English

Building Blocks of Impact Evaluation

Strategies for Causal Attribution

Randomized Controlled Trials (RCTs)

Data Collection and Analysis

Learning Outcomes

After watching these videos, you will:

- Understand the basic components of impact evaluation;
- Be able to name who needs to be involved in an impact evaluation;
- Understand how a theory of change is used in an impact evaluation;
- Understand the concepts of random sampling, random assignment, stratified sampling and factorial design.

Overview of Impact Evaluation

Impact evaluation provides information about the impacts produced by an intervention. It can be undertaken of a programme or a policy, or upstream work – such as capacity building, policy advocacy and support for an enabling environment.

Course Structure

What is impact evaluation- and why does it matter?

Topic

Strategies

Establishing Governance and management arrangements

Format:

E-Learning

Provider:

UNICEF

Language:

English, French and Spanish

Course Level

Beginner

Audience

UNICEF Staff and partners

Learning Outcomes

By the end of the course, you will be able to:

- Give an overview of the different elements of impact evaluation and options for planning and managing its various stages.

Results-Based Management (RBM)

Short E-Course
UNICEF activity

Considered a key management approach, results-based management (RBM) is a core staff skill everyone in UNICEF should acquire. The consistent use of RBM enables us to reach the most disadvantaged children and to report these results regularly to our stakeholders.

Course Structure

Topic

Focus Area, Children and Youth, Managing Projects

Introduction to Water and Climate

For students of engineering, climate science and environmental studies, this course offers a first introduction to the physics of water systems and their role in climate. In addition, we show you the state-of-the-art engineering interventions that can be applied to water systems. These can improve coastal safety and increase the availability of water supplies worldwide.

Topic

Environmental and Climate

Format:

E-Learning, Massive Open Online Courses

Provider:

MOOC platform, Edx

Language:

English

Course Level

Beginner

Audience

General Public

Learning Outcomes

After taking this course, you will be able to:

- Understand the different processes at play in the global water cycle;
- Better understand and adapt to the impact of climate change on water for the coming 50 years;
- Identify and describe the flows of water and sand;
- Identify mechanisms of climate change and explain the interplay between climate change, sea level, clouds, rainfall and future weather;
- Explain why, when and which engineering interventions are needed.

Introductory e-Course on Climate Change

The course provides clear, concise and up-to-date information for anybody interested in obtaining a general understanding about climate change.

Topic

Environmental and Climate

Format:

E-Learning

Provider:

International Water
Association

Language:

English

Course Level

Beginner

Audience

General Public

Learning Outcomes

After taking this course, you will be able to:

- Explain the fundamentals of climate change science;
- Present the international climate change legal and policy framework;
- Describe the expected consequences of climate change and the role of adaptation;
- Provide a rationale for climate change mitigation;
- Identify main streams of climate change finance.

Water in a Thirsty World

In this course you will take the journey of water- how it began, and its availability today in light of global warming and urbanization. You will see that the natural environment is reaching a threshold, and the impact that has for us and the water supplies that we rely on.

MOOC
Non-UN provider

Topic

Water, Sanitation & Hygiene (WASH)

Format:

E-Learning

Provider:

MOOC platforms

Language:

English

Course Level

Beginner

Audience

UNICEF Staff and Partners

Learning Outcomes

After this course you will:

- Have learned about climate change and urbanisation and its impact on the water cycle;
- Know what climate change means for people and the environment;
- What Renewable Energy means for the Water Cycle as a solution to Climate Change;
- How water and wastewater is piped and treated;
- How to be climate resilient by using seawater and wastewater as new water sources;

Introduction to Faecal Sludge Management

This free course is part of the series "Sanitation, Water and Solid Waste for Development." Do you want to learn how to apply concepts of sustainable faecal sludge management (FSM) on a city-wide scale? This free course starts with an overview of what faecal sludge is and introduces you to the engineering fundamentals and required information for the design and selection of technologies.

Topic

Sanitation

Format:

E-Learning

Provider:

Coursera

Language:

English with subtitles:
English, French, Portuguese
(European), Spanish

Course Level

Intermediate

Audience

General Public

Duration

15 hours

Learning Outcomes

After taking this course, you will be able to:

- Know what is faecal sludge, and the importance of an integrated approach;
- Integrate engineering design approach, and know fundamentals and information for design and selection of technologies;
- Understand engineering aspects of how to size and properly operate treatment technologies;
- Integrate approach to faecal sludge management;
- Know innovations in faecal sludge management.

Introduction to Household Water Treatment and Safe Storage

**Topic**

Sanitation

Format:

E-Learning

Provider:

Coursera

Languages:

English, French and Spanish

Course Level

Intermediate

Audience

General Public

Duration

14 hours

It is well known that water treatment at the household level can lead to dramatic improvements in drinking water quality. But does Household Water Treatment and Safe Storage (HWTS) also have global relevance? What are the potential treatment solutions and how do they function? Is there a standard strategy for successful HWTS implementation, or can we identify key components which make programs more likely to succeed?

In this course you will learn about the most important water treatment methods at household level, successful implementation strategies and about assessing the impact of HWTS.

Learning Outcomes

By the end of this course you should be able to:

- Review public health impacts of unsafe drinking water;
- Know potential treatment methods;
- Highlight key components which make programs more likely to succeed;
- Know different approaches for monitoring and evaluating HWTS.

Planning and Design of Sanitation Systems and Technologies

This free course is part of the series "Sanitation, Water and Solid Waste for Development." This course provides you with an introduction to integrated sanitation planning, both on a citywide scale and for specific contexts such as informal settlements. You will become familiar with different sanitation planning frameworks as well as different systems and technologies relevant along the sanitation value chain.

Topic

Sanitation

Format:

E-Learning

Provider:

Coursera

Languages:

English and French

Subtitles

English, French, Portuguese (European), Spanish

Course Level

Intermediate

Audience

General Public

Duration

15 hours

Learning Outcomes

By the end of this course you should be able to:

- Review sanitation planning & systems approach;
- Know different sanitation planning frameworks;
- Highlight technical aspects of different sanitation systems;
- Access case studies from Africa and Asia;
- Be familiar with various urban sanitation tools.

Reliable Planning of Sanitation Service Chain Solutions in Emergencies

**Topic**

Audience

Unicef Staff and Partners

Contact

Samuel.Renggli@eawag.ch

The eCompendium is a comprehensive and well-structured online capacity development and decision support tool that allows real time filtering and configuration of entire sanitation service chain solutions in emergency settings. It provides detailed information on key decision criteria for all tried and tested emergency sanitation technologies, information on cross-cutting issues and available case studies, relevant to come up with informed sanitation technology decisions in emergencies.

Learning Outcomes

By the end of this course you should be able to:

- Understand user interface;
- Know collecting and storage/treatment;
- Acknowledge (semi)-centralised treatment;
- Know use and/disposal applications;
- Understand cross-cutting issues.

Social Norms, Social Change I

The course teaches how to measure social norms and the expectations that support them, and how to decide whether they cause specific behaviors. The course includes many examples of norms that sustain behaviors like child marriage, gender violence and sanitation practices.

Offered at least twice annually, check the website.

Topic

Sanitation

Format:

Duration

15 and 12 hours respectively

Contact

megnilo@unicef.org

Learning Outcomes

By the end of this course you should be able to:

- Know Interdependent & Independent Actions + Empirical Expectations;
- Understand Normative Expectations + Personal Normative Beliefs;
- Acknowledge Conditional Preferences + Social Norms
- Differentiate Pluralistic Ignorance + Measuring Norms.

Gender Monitoring and Evaluation

Short E-Course
Non-UN provider

This course has been developed for program managers working on gender-focused programs, gender advisors, and individuals working in gender affairs, ministries of gender, or other government departments focusing on gender who seek to strengthen their understanding of M&E.

Topic

Strategies, Equity, Gender equality/ parity, Operational support

Format:

E-Learning- Resource

Provider:

NGOs and governmental bodies, USAID

Language:

English

Course Level

Beginner

Audience

UNICEF Staff and Partners

Duration

90 Minutes

Learning Outcomes

By the end of this course, you will be able to:

- Define what gender M&E is and why it is important;
- Explain the difference between sex-disaggregated indicators and gender-sensitive indicators;
- Provide examples of gender considerations in data collection, data interpretation, and data use;
- Identify specific tools and resources to further support gender M&E.

Count me in! Inclusive WASH in Ethiopia

Count me in! Inclusive WASH in Ethiopia is one of six modules in the OpenWASH learning resources. This module aims to raise awareness of the reasons why people are excluded and how this impacts their lives. It offers guidance on what changes and provisions are needed to promote and secure all people's rights to water and sanitation.

Topic

General WASH

Format:

E-Learning

Provider:

Openlearn create

Language:

English

Course Level

Beginner

Audience

General Public

Learning Outcomes

After you have studied this Module you should be able to:

- Identify people who are likely to be excluded from WASH services;
- Describe the barriers to inclusive WASH;
- Design and implement suitable technologies and service provision to ensure all members of society are served;
- Actively engage in methods and tools that promote inclusive WASH services.

One UN Climate Change Learning Partnership: Think, Talk, Act Climate

One UN Climate Change Learning Partnership: Think, Talk, Act Climate - several short self paced courses, tutorials, and a MOOC addressing climate. Such as: Keeping the Taps Running in a Changing Climate, Children and Climate Change, Climate Policy and Public Finance.

Drinking Water Treatment

This seven-week course focuses on conventional technologies for drinking water treatment. Unit processes, involved in the treatment chain, are discussed as well as the physical, chemical and biological processes involved. The emphasis is on the effect of treatment on water quality and the dimensions of the unit processes in the treatment chain. This course in combination with the courses "Introduction to Water and Climate" and "Introduction to the Treatment of Urban Sewage" forms the Water XSeries, by DelftX

Topic
Water

Format:
E-Learning

Duration
7 weeks

Learning Outcomes

By the end of this course you should be able to:

- Recognize the process units in urban water services;
- Describe the function of these process units;
- Describe the physical and chemical processes involved;
- Make simple design calculations on drinking water treatment plants.

Water Resources Management and Policy

The objective is to develop an understanding of the problems related to water management. Firstly, this course will define a resource and, more specifically, the resource of water. It will look at how water is used and the activities associated with it as well as any potential conflicts. The course will look at water management in detail through the analysis of the different types of rights and obligations associated with, for example, the development of a multi-sectorial regulation system or a watershed management approach.

Learning Outcomes

By the end of this course, our aim is to enable you to:

- Identify the main issues and strategies linked to water resource management
- Acquire the key reading material needed to understand the many variables (environmental, institutional and political) which affect water and which, in terms of management, may require adjustment.

Water Security for Policy Makers and Practitioners

Securing water for all is a global challenge for all countries. On this short course, you'll develop a broad and cross-disciplinary understanding of water security and its related dimensions. You'll focus on how water security for human populations is socially and politically determined, and the consequences of water insecurity on a range of stakeholders and environments. You will benefit from our in-depth understanding of interrelated issues to think about how to co-create water secure futures.

Learning Outcomes

By the end of this course, our aim is to enable you to:

- Facilitate a cross-disciplinary understanding of water security to build on existing knowledge of water issues amongst diverse stakeholder;
- Examine how water security is socially and politically determined;
- Understand the nature and assessment of water security in relation to diverse themes and sectors.

Water Safety Plans: Risk-Management for Drinking Water Supplies

The Water Institute at the University of North Carolina at Chapel Hill (USA) is offering a 9-week online learning course on Water Safety Plans (WSPs) aimed at those in the water industry with management, engineering, or operational responsibilities. WSPs represent a novel approach for drinking water suppliers to manage the risks of system failure, and have been recommended by the World Health Organization since 2004. WSPs have been piloted or required in more than 90 countries.

Al final del curso podrás:

- Describir las diferentes motivaciones de realizar estudios de huella de agua y explicar el valor agregado utilizando ejemplos ilustrativos;
- Aplicar el concepto de huella de agua de acuerdo con ISO 14046 en un proyecto práctico;
- Enumerar todos los datos necesarios para realizar un estudio sobre la huella de agua y describir las fortalezas y debilidades de las bases de datos y programas informáticos disponibles.

Governance in Humanitarian Contexts

The course aims to critically analyse the humanitarian architecture through a multi-level governance approach, with a focus on global, national and local actors. From here, participants will reflect on decision-making processes for humanitarian WASH (including aspects of needs assessments and information management) and analyse quality assurance and accountability mechanisms to safeguard WASH outcomes.

Duration

6-8 hours per week

Learning Outcomes

After completing this course you will be able to:

- Know what constitutes a humanitarian situation and different types.
- Identify the major actors in humanitarian sector.
- Understand international humanitarian principles and legal frameworks.
- Define (multi-level) governance as an approach to navigate decision-making.
- Coordinate mechanisms in humanitarian contexts.

Environmental and Public Health in Humanitarian Contexts

This course aims to instruct participants on how to critically design WASH responses to humanitarian crises while focusing on protecting environmental and public health. Participants will become familiar with the critical link between public health and humanitarian WASH responses, learn how to design WASH approaches with a public health focus, and explain how to work with epidemiological data to strategically plan whole-of-disaster cycle approaches.

Topic

Water, Sanitation & Hygiene (WASH)

Format:

E-Learning

Provider:

Universities and affiliates, IHE Delft

Duration

20 hours

Learning Outcomes

Upon the successful completion of this programme, participants will be able to:

- See how engineers can have a significant impact to reduce the mortality and morbidity encountered in many humanitarian contexts;
- Understand how protracted conflicts affect urban essential services;
- Discuss some pros and cons of different water systems;
- Know sanitation technologies and excreta management;
- Discuss the critical issue of behavior change and hygiene promotion in humanitarian crises.

Water Supply and Sanitation Policy in Developing Countries

Part 1: Understanding Complex Problems

This roughly 22-hour course explores what can be done to solve the complex problem that half a billion people worldwide do not have improved water supplies and two billion do not have improved sanitation. We look forward to you joining us. We want to help you develop the skills you need to address this major global challenge of the 21st century. See web link for details, runs every 6-8 weeks with flexible deadlines. Earn a certificate. Contact: Duncan Thomas- Duncan.Thomas@manchester.ac.uk / Dale Whittington - profdalewhittington@gmail.com.

Learning Outcomes

Upon the successful completion of this course, participants will be able to:

- Know Key Facts about Water and Sanitation Services;
- Understand the Political Economy of Water;
- Supply-Side Costs of Water and Sanitation Services;
- Understand Demand-Side Issues of Water Supply;
- Explor Health Benefits and Climate Change Issues.

Water Supply and Sanitation Policy in Developing Countries

Part 2: Developing Effective Interventions

Here we invite you to develop analytical skills and deep understanding about a complex, controversial policy problem – one with no simple, easy answers. About half a billion people on our planet still lack access to improved water supplies and about two billion do not have improved sanitation services, leading to an unknown but very large number of avoidable deaths each year from water-related diseases.

Learning Outcomes

By the end of this course, you will be able to:

- Describe the technologies available to provide safe drinking water in urban settings and the main challenges associated with them;
- Understand the characteristics and requirements of services provided and managed by a water utility;
- Explain the regulatory and economic issues related to piped water supply services to households and water points;
- Describe how water emergencies can be managed;
- Describe options for private sector engagement in provision of urban water supply and related services.

Introduction to Treatment of Urban Sewage

This course will focus on basic technologies for the treatment of urban sewage. Unit processes involved in the treatment chain will be described as well as the physical, chemical and biological processes involved. There will be an emphasis on water quality and the functionality of each unit process within the treatment chain.

- Enter the link by clicking on the photo or title, choose the course that interests you and search for learning outcomes

Building Blocks of Sustainable WASH Systems

When WASH systems are strong and resilient they deliver services that meet people's needs. When they are weak, services are poor, unreliable or fail altogether. The WASH systems strengthening approach looks at the WASH system as a whole, through the lens of 9 critical "building blocks" as monitoring, finance and policy and legislation. Each session in this course focuses on one of these building blocks of a sustainable system.

Topic

Enabling Environments

Format:

E-Learning

Provider:

IRC

Language:

English

Course Level

Beginner

Audience

General Public

Duration

16 hours

Contact

training@ircwash.org

Learning Outcomes

After completing this course, you will know:

- The details of the 9 critical building blocks of sustainable WASH services;
- Entry points on how to start strengthening WASH systems.

Finance for Sustainable WASH Systems

A lack of finance is one of the main reasons for unsustainable services, leaving many people without access. Through this 16-hour course, you will learn how to attract more funding for water, sanitation and hygiene (WASH) services and how to use existing funds more efficiently and effectively.

Topic

Finance

Format:

E-Learning

Provider:

IRC

Language:

English

Course Level

Intermediate

Audience

General Public

Duration

16 hours

Contact

training@ircwash.org

Learning Outcomes

By the end of the course, participants will have a good understanding of finance as an essential part of sustainable WASH systems. You will know:

- How finance is one of the essential building blocks for universal and sustainable WASH services;
- What finance for universal and sustainable WASH services entails;
- The status of finance for universal WASH services;
- Ways to strengthen finance for more resilient WASH systems.

Water Economics

This course provides an introduction to economic theory and approach as applied to water management. It is for professionals in water-related fields with no prior economic background.

Topic

Finance

Format:

E-learning

Provider:

Universities and affiliates, IHE Delft

Language:

English

Course Level

Beginner

Audience

General Public

Contact

y.jiang@un-ihe.org

Learning Outcomes

By the end of this course, you will be able to:

- Describe the principles of economics and the relevance of economics to water management;
- Describe and discuss market mechanism and economic efficiency and relevance to water management;
- Characterize and explain water resource issues using economic concepts and theory;
- List and review economic instruments for water management.

Knowledge Management Training

Find out how your organisation can learn from its people and its experiences to become more innovative, responsive and strategic:

- develop a culture that harnesses the know-how and experience of your people;
- make knowledge accessible to everyone who needs it, by building KS into everyday operations;
- use Knowledge Management to achieve and support your strategic objectives.

Topic

Research Knowledge Management and Evidence

Format:

E-learning

Provider:

Ima International

Language:

English

Course Level

Beginner

Audience

UNICEF Staff and Partners

Contact

post@imainternational.com

Learning Outcomes

By the end of this course, you will be able to:

- Clarify key KM concepts and definitions;
- Articulate the costs of disregarding KM and the benefits of practising KM;
- Identify key elements for KM and KS adoption;
- Explore how to develop a conducive environment for knowledge sharing;
- Familiarise yourself with KM assessments and learn how to make the best use of them.

Different Needs , Equal Opportunities: Increasing Effectiveness of Humanitarian Action for Women, Girls, Boys and Men

This course is targeted to all humanitarian staff from UN, NGOs, government and civil society looking for an introduction on how to integrate gender equality, and the empowerment of women and girls in the assessment, planning, implementation and monitoring of humanitarian programming.

Topic

Research Knowledge
Management and Evidence

Format:

E-learning

Provider:

UN Women

Language:

English

Course Level

Beginner

Audience

UNICEF Staff and Partners

Duration

3 Hours

Contact

david.coffey@unwomen.org

Learning Outcomes

By the end of this course, you will be able to:

- Have an introductory guidance;
- Have information and know practical examples;
- Understand the fundamentals of applying a gender-equality approach.

Experience capitalization for continuous learning

This course introduces the methodology of experience capitalization and offers practical tools. Experience capitalization is a systematic, interactive and participatory process through which an experience is analyzed and documented. This creates knowledge, which can be shared and used to generate change.

Topic

Research Knowledge
Management and Evidence

Format:

E-learning

Provider:

Food and Agriculture
Organization of the United
Nations Elearning Academy

Language:

English

Course Level

Intermediate

Audience

UNICEF Staff and Partners

Contact

elearning-enquiries@fao.org

Learning Outcomes

By the end of this course, you will learn about:

- How to facilitate and plan an experience capitalization process;
- How to implement an experience capitalization process step by step;
- How to adopt, adapt, scale up and mainstream experience capitalization.

Post Disaster Needs Assessment (PDNA)

Online Courses
UN system activity

The Post Disaster Needs Assessment, PDNA, is a joint product of the European Union, the World Bank and the United Nations Development Group, drawn up as an effort to harmonize post crises assessments, including those associated to disasters triggered by natural hazards

Topic

Strategies, Operational support

Format:

E-learning

Provider:

UN & UN agencies, UNDP

Language:

English, French, Spanish and Portuguese

Course Level

Beginner

Audience

UNICEF Staff and Partners

Duration

30 Minutes

Contact

hsargsyan@unicef.org

Learning Outcomes

By the end of this course, you will be able to:

- Understand the fundamentals of the PDNA methodology

Supply Chain Fundamentals

Online Courses
Non-UN provider

This Supply Chain Fundamentals course is part of the MITx MicroMasters Credential in Supply Chain Management, offered by the #1 ranked SCM Master's program at the Massachusetts Institute of Technology. The CTL.SC1x Supply Chain Fundamentals course provides the foundational skills for supply chain management and logistics.

Topic

Strategies, Operational support

Format:

E-learning

Provider:

EDX

Language:

English

Course Level

Beginner

Audience

UNICEF Staff and Partners

Duration

13 weeks- 2 hours per week

Learning Outcomes

By the end of this course, you will be able to:

- Incorporate and manage uncertainty and risk within supply chain management;
- Segment different customers, products, and channels and design an optimal portfolio of logistics approaches;
- Identify, design, and implement the appropriate forecasting methodology for each segment;
- Identify, design, and implement the appropriate inventory replenishment policy for each segment.

Disease Outbreaks in Low- & Middle-Income Countries

Explore disease outbreaks, what they are and why they matter. Discover how to prepare and respond to outbreaks now and in the future. Understand disease outbreaks and learn how to prepare for them with this course for people working in or studying global health.

Topic

Health

Format:

E-learning

Provider:

London School of Hygiene & Tropical Medicine

Language:

English

Course Level

Beginner

Audience

General Public

Contact

study@lshtm.ac.uk

Learning Outcomes

By the end of the course, you'll be able to:

- Describe and define what outbreaks are and their impacts;
- Explore future approaches to outbreak preparedness and response;
- Describe how we prepare for and respond to outbreaks.

Eliminating Trachoma

Discover how communities and experts are joining together to end trachoma disease across over 44 endemic countries. Explore how the trachoma disease is being combated across the globe.

Topic

Health

Format:

E-learning

Provider:

London School of Hygiene & Tropical Medicine

Language:

English

Course Level

Beginner

Audience

General Public

Contact

study@lshtm.ac.uk

Learning Outcomes

By the end of the course, you'll be able to:

- Assess the natural history, clinical signs and grading of trachoma;
- Reflect on the public health approach for the control of trachoma;
- Discuss how epidemiological data provides guidance for interventions and setting local targets;
- Apply monitoring and evaluation indicators of SAFE interventions;
- Describe the evidence from global mapping of trachoma.

Global Health and Disability

Learn more about the importance of health and well-being of people with disabilities in the context of the global development agenda. Leaving no one behind: disability, health and wellbeing in global development

Topic

Health

Format:

E-learning

Provider:

London School of Hygiene & Tropical Medicine

Language:

English

Course Level

Beginner

Audience

General Public

Contact

study@lshtm.ac.uk

Learning Outcomes

By the end of the course, you'll be able to:

- Describe the links between disability, health and wellbeing;
- Develop an understanding of what disability is and its relevance to the global development agenda;
- Identify solutions to improve health and wellbeing amongst people with disabilities;
- Discuss challenges to health and wellbeing amongst people with disabilities;
- Reflect on how different types of disabilities affect people's lives in different ways.

Health in Humanitarian Crises

Discover the health needs of those affected by humanitarian crises, challenges of delivering healthcare, and what we must do next. Humanitarian crises due to armed conflict, natural disasters, disease outbreaks and other hazards are a major and growing contributor to ill-health and vulnerability worldwide, and their continuing effects on health and health systems can undermine decades of social development.

Topic

Health

Format:

E-learning

Provider:

London School of Hygiene & Tropical Medicine

Language:

English

Course Level

Beginner

Audience

General Public

Contact

study@lshtm.ac.uk

Learning Outcomes

By the end of the course, you'll be able to:

- Explore the different types of humanitarian crises and their resulting impacts on population health and health systems;
- Assess emerging trends in humanitarian crises and consider how the humanitarian sector may need to adapt as a result;
- Reflect on humanitarian principles, ethics, and codes of conduct and how these come into play when delivering humanitarian health interventions.

Improving the Health of Women, Children and Adolescents: from Evidence to Action

This training course presents the latest data, priorities and debates about the health of adolescents, mothers, newborns and children worldwide.

Topic

Health

Format:

E-learning

Provider:

London School of Hygiene & Tropical Medicine

Language:

English

Course Level

Beginner

Audience

General Public

Contact

study@lshtm.ac.uk

Learning Outcomes

By the end of the course, you'll be able to:

- Investigate health across the lifecycle, from newborn to child, to adolescents and women, in areas of the world where the burden of disease is highest;
- Evaluate the evidence on what causes poor health outcomes and what is known about how to prevent them;
- Engage with how different stages of the lifecycle affect each other.

Water Engineering and Development Centre Short course

Designed for either new or experienced staff working on water, sanitation and hygiene development across the globe, WEDC short courses are a means to rapidly develop new skills.

Topic

General WASH

Format:

E-learning

Provider:

WEDC

Language:

English

New Partners WASH Trainings

Wash'Em - Hand Hygiene in Emergencies

Online Courses
Non-UN provider

Topic

Water, Sanitation & Hygiene (WASH)

Format:

E-Learning

Provider:

Centre for Affordable Water and Sanitation Technology (CAWST)

Languages:

English, French and Spanish

Course Level

Intermediate

Audience

UNICEF Staff and Partners

Duration

10 Hours

Contact

nklaesener@unicef.org

In this course, you will work independently through a series of e-learning modules to learn the logic behind Wash'Em and how to use Wash'Em tools to design a context-specific and evidence-based hygiene program. The Wash'Em process involves using 5 rapid assessment tools to understand behaviour and entering your findings into the Wash'Em software for tailored program recommendations. This course teaches you how to implement this process with a team.

Learning Outcomes

By the end of this course, you will be able to:

- Explain the logic behind the Wash'Em methodology and toolkit;
- Use the Wash'Em rapid-assessment tools to collect information about the community of interest;
- Analyze the data collected through the Wash'Em tools;
- Use the Wash'Em software to generate context-specific recommendations for a handwashing intervention.

Foundations of public health practice: Health protection

MOOC
Non-UN provider

The Health Protection course is the fourth instalment of the wider Foundations of Public Health Practice specialisation from Imperial College London's Global Master of Public Health (MPH). The scope and content of this course has been developed from the ground up by a combined team of academics and practitioners drawing on decades of real-world public health experience as well as deep academic knowledge.

Topic

Health and Nutrition

Format:

E-Learning

Provider:

Coursera

Language:

English

Course Level

Beginner

Audience

All audiences

Duration

3 hours per week

Learning Outcomes

By the end of this course, you will be able to:

- Use the principles which underpin public health as a discipline in order to articulate public health objectives;
- Critically analyse public health challenges using data and health intelligence in order to characterise need and prioritise actions for key stakeholders;
- Devise effective interventions using behaviour change theory and other public health approaches in order to improve population;health outcomes;
- Assess both operational and strategic health protection threats in order to recommend appropriate management actions to relevant parties.

Planning and Design of Sanitation Systems and Technologies

MOOC
Non-UN provider

Do you want to learn how to plan affordable and context-specific sanitation solutions? Do you want to be updated on the newest developments in urban sanitation planning and programming? Do you want to get insights about best practices examples of urban sanitation systems in low- and middle-income countries? If yes, this course is for you!

Topic

Water, Sanitation & Hygiene (WASH)

Format:

E-Learning

Provider:

Coursera

Language:

English

Course Level

Beginner

Audience

All audiences

Duration

18 hours

Learning Outcomes

By the end of this course, you will be able to:

- Identify why sanitation is important for human health and environmental protection, especially in urban areas;
- Know about the systems approach to environmental sanitation – the key terminology and concepts and why systems' thinking is crucial for urban environmental sanitation;
- Have an overview of different sanitation systems;
- Access case studies from Africa and Asia showing different sanitation solutions from neighbourhood to national scale;
- Know various urban sanitation tools.

Implementing Environmental Flows to Support Sustainable Water Resources Management

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts.

Short courses are meant for professionals –or groups of professionals– with a specific area of interest and a limited amount of time. The focus and content of short courses vary from specialised and technical matters to challenges and approaches in management. You can find the link for all short courses [here](#)

Topic

Water

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Enhance an interdisciplinary understanding of transboundary water challenges and advance tools for water cooperation and diplomacy, as well as to strengthen professional networking among the next generation of leading water and environmental diplomats.

Water Policy

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts. You can find the link for all short courses [here](#). In this course we introduce you to ways of understanding the complexities of policy and offer approaches to deal with it.

Topic

Water

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Use policy theories to describe and explain water policy making and implementation processes;
- Critically assess underlying theories (cause-effect relations, normative assumptions, means-ends relations) in water and environmental policy implementation and management plans;
- Explain and critically reflect on how policy is made at field level (the role of implementers in interaction with target groups);
- Able to critically evaluate policy on impact for policy learning.

Water Quality Assessment and Monitoring

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts. You can find the link for all short courses [here](#). This is a three weeks course covering the design and implementation of a monitoring network for surface- and groundwater bodies.

Topic

Water

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Select and apply appropriate methods to assess water quality in freshwaters in relation to their anticipated use;
- Design and evaluate water quality monitoring networks for different types of surface and groundwater in relation to set objectives;
- Report the results of water quality assessment and monitoring programmes using appropriate statistical tools for interpretation and presentation of large data sets.

Sanitation Resource Recovery

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts.

You can find the link for all short courses [here](#)

This short course introduces participants to different resource recovery opportunities along the sanitation chain.

Topic

Sanitation

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Discuss the different resource recovery opportunities along the sanitation chain;
- Explain the main physicochemical and microbial mechanism behind the resource recovery process;
- Design specific laboratory test to evaluate the feasibility of certain resource recovery.

Groundwater Resources and Treatment

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts.

You can find the link for all short courses [here](#)

The purpose of this course is to acquaint the participants with theoretical and practical knowledge, field experience, and innovations in IHE Delft research in the areas of conventional, as well as advanced methods for treatment of groundwater intended for water supply.

Topic

Water

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Assess if given groundwater is aggressive against materials used in water supply system and propose appropriate neutralisation methods;
- Describe importance of groundwater as a source for drinking water production and assess overall quality of a given groundwater;
- Establish appropriate treatment approach for groundwater containing commonly occurring impurities and pollutants (iron, manganese, ammonia, fluoride, arsenic, hydrogen sulphide and nitrate);
- Explore advanced groundwater treatment approaches applied in The Netherlands and in Belgium for removal of emerging pollutants.

Citizen Science for Water Management and Sustainable Development

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts.

You can find the link for all short courses [here](#)

The aim of this course is for participants to gain a basic understanding of the role and relevance of citizen science projects for water management and sustainable development, and to provide participants with an overview of the main concepts, best practices, and tools for designing and implementing water-related citizen science projects.

Topic

Water

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Differentiate between forms of citizen science for distinct purposes, especially for water-related contexts.
- Outline basic steps and best practices for citizen science project planning and implementation.
- Describe citizen science projects as socio-technical systems and the role of culture, internal, and external communication in achieving goals and managing expectations.
- Describe the potential and challenges of citizen science for water management and sustainable development.

Stakeholders, Partnerships and Network Analysis

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts. You can find the link for all short courses [here](#). This course will help you operate effectively in stakeholder networks and partnerships. Whether it is about drinking water and sanitation, agricultural water management, climate adaptation or water protection, always multiple stakeholders are involved, at different levels.

Topic

Water, Sanitation & Hygiene

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Critically discuss the different theories and concepts of partnerships and networks in the water sector, transcending scales and sectors.
- Explain different approaches for (advanced) stakeholder analysis and implement a stakeholder analysis in practice.
- Reflect on the implications of a stakeholder analysis for an existing partnership or network, from an interdisciplinary perspective.

Managing Resilient Water Utilities

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts.

You can find the link for all short courses [here](#)

This course discusses how water utilities can become more resilient by investigating experiences of Dutch water utilities to increase resilience.

Topic

Water

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Describe and contrast different definitions and interpretations of resilience;
- Explain how different water utilities have operationalized and implemented the concept of resilience;
- Analyze the change processes aimed at making water utilities more resilient.

Environmental and Social Impact Assessment at Project and Strategic Levels

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts.

You can find the link for all short courses [here](#)

This course is about the role of Strategic Environmental Assessment in guiding sectoral and regional planning towards sustainability, supporting strategic decision, and its links with the Environmental Impact Assessment practice.

Topic

Water, Sanitation & Hygiene

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Develop the capacity to conduct and environmental and social impact assessment or strategic environmental assessment;
- Compare the EIA and SEA processes and their role in helping achieve SDGs by addressing social, economic and/or environmental issues at different scales;
- Apply selected methods for impact assessment with a system thinking approach to differentiate how it increases its contribution to sustainable development;
- Discuss how the involvement of stakeholders in impact assessments contributes to the effectiveness and sustainability of projects and strategic interventions.

Experimental Methods in Desalination and Membrane Technology

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts.

You can find the link for all short courses [here](#)

This course covers the fundamentals of membrane-based desalination and the experimental and analytical methods for water quality characterization applied in desalination and membrane technology processes for producing drinking and industrial water and water for irrigation.

Topic

Water, Sanitation & Hygiene

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Explain the fundamentals of membrane-based desalination;
- Explain the fundamentals and main methodological steps involved in the preparation and conduction of experimental methods applied to assess fouling and scaling in desalination and water treatment systems;
- Design and conduct experimental methods to assess the fouling and scaling potential of water along a treatment process;
- Critically analyse and discuss data and results obtained from experimental methods to assess the fouling and scaling potential in treatment systems.

Ecosystem Services Assessment for Informed Decision Making

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts. You can find the link for all short courses [here](#). This course is intended to deliver a tool useful in practice that combines and integrates biophysical and social-economic aspects of ecosystem services in developing a systematic and holistic assessment of the role and contribution of ecosystems to human society.

Topic

Water, Sanitation & Hygiene

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Describe the ecosystem services framework and relevance to development and policy decision making;
- Identify and link ecosystem services, stakeholders, value generation in policy decision-making;
- Review different approaches and tools for ecosystem services assessment and conditions for application;
- Conduct ecosystem service assessment for policy and development decision.

Remote Sensing for Agricultural Water Management

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts.

You can find the link for all short courses [here](#)

This short course aims to provide the participants with the ability to use remote sensing techniques and satellite data to assess the agricultural land and water use.

Topic

Water, Sanitation & Hygiene

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Have an overview of remote sensing applications in agricultural water management;
- Explain Surface Energy Balance Model to compute evapotranspiration using satellite data;
- Understand remote sensing based crop yield and Water productivity assessment;
- Understand remote Sensing for irrigation performance assessment

Water Resources Planning under Changing Climate and Environment

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts. You can find the link for all short courses [here](#). This course introduces the major aspects and provides practical opportunity to experience the processes in multidisciplinary collaboration for targeted water resources planning within a development context.

Topic
Water

Format:
E-Learning

Provider:
IHE Delft

Language:
English

Course Level
Intermediate

Audience
All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Describe the expected impacts of climate change on water resources and water use sectors in relation to (other) human activities.
- Identify the consequences of the predicted impacts of climate change and climate variability for integrated water resources management.
- Integrate climatic change conditions at different time and spatial scales into water resources planning and development.
- Justify decisions on adaptation to the impacts of climate change under uncertainty.

Water Economics

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts. You can find the link for all short courses [here](#). This course provides an introduction to economic theory and approach as applied to water management. It is for professionals in water-related fields with no prior economic background.

Topic

Water

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Intermediate

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Layout the policy context for water economics;
- Introduce economic principles, concepts, and theory to build economic foundation for understanding water issues;
- Elaborate on and synthesize economic approaches to managing water, including quantity and price based policy instruments, institutional role, and benefit-cost analysis.

Flood and Coastal Erosion Risk Assessment

IHE Delft conducts a wide range of short, intensive and highly specialized courses which are aimed at upgrading and refreshing the knowledge and skills of mid-career professional and senior experts.

You can find the link for all short courses [here](#)

Learn to quantitatively estimate flood and coastal erosion risks under a changing climate from world-renowned experts on the topic using examples from around the world; To effectively communicate actionable risk information; To clearly understand and act on risk information.

Topic

Water

Format:

E-Learning

Provider:

IHE Delft

Language:

English

Course Level

Audience

All audiences

Learning Outcomes

By the end of this course, you will be able to:

- Setup quantification of risk as a computational problem and apply simulation models to estimate hazards in the context of flood and coastal erosion hazards.
- Calculate risk by combining hazards into suitable risk models.
- Communicate quantified risk information in understandable, but also actionable means.
- Justify decisions on adaption to the impacts of climate change under uncertainty.

MSc in Water Management for Development

Our Water Management for Development (Distance Learning) MSc is designed to develop careers managing water supply and environmental sanitation infrastructure and services for low- and middle-income countries (LMICs).

The programme supports the professionalisation of the sector through addressing issues relating to policy development, improving performance, institutional reform, change management, benchmarking services, and the financial viability of institutions.

Topic

Water, Sanitation & Hygiene (WASH)

Format:

E-Learning

Provider:

Loughborough University

Language:

English

Course Level

Advanced

Audience

All audiences

Duration

2-5 years

Learning Outcomes

By the end of this course, you will be able to:

- Provide knowledge of key concepts and principles to assess and design water and environmental sanitation;
- Provide the multidisciplinary knowledge and skills to assess, design, implement and operate sustainable water and environmental sanitation infrastructure;
- Develop appropriate analytical skills for water in the natural environment and piped systems using computer models and other approaches;
- Develop a critical approach to the global principles and local practice of sustainable public health infrastructure for all levels of consumers;
- Encourage critical analysis through an in-depth study of one specialist topic.

MSc in Water Engineering for Development

**Loughborough
University**

Our Water Engineering for Development (Distance Learning) MSc is designed to develop careers for improving the delivery of water supply and environmental sanitation infrastructure and services internationally, with a focus on low- and middle-income countries (LMICs).

The programme provides knowledge of key concepts and principles to assess, design, implement and operate sustainable and equitable water and environmental sanitation infrastructure and services.

- Develop appropriate analytical skills for water in the natural environment and piped systems using computer models and other approaches;
- Develop a critical approach to the global principles and local practice of sustainable public health infrastructure for all levels of consumers; and
- Encourage critical analysis through an in-depth study of one specialist topic.

MSc in Water Management for Development

Our Water Management for Development (Distance Learning) MSc is designed to develop careers managing water supply and environmental sanitation infrastructure and services for low- and middle-income countries (LMICs).

The programme supports the professionalisation of the sector through addressing issues relating to policy development, improving performance, institutional reform, change management, benchmarking services, and the financial viability of institutions.

Topic

Water, Sanitation & Hygiene (WASH)

Format:

E-Learning

Provider:

Loughborough University

Language:

English

Course Level

Advanced

Audience

All audiences

Duration

2-5 years

Learning Outcomes

By the end of this course, you will be able to:

- Provide knowledge of key concepts and principles to assess and design water and environmental sanitation;
- Provide the multidisciplinary knowledge and skills to assess, design, implement and operate sustainable water and environmental sanitation infrastructure;
- Develop appropriate analytical skills for water in the natural environment and piped systems using computer models and other approaches;
- Develop a critical approach to the global principles and local practice of sustainable public health infrastructure for all levels of consumers;
- encourage critical analysis through an in-depth study of one specialist topic.

MSc in International Sustainable Development

**Loughborough
University**

Our International Sustainable Development MSc will enhance both your conceptual and practical understanding of international development with a specialisation in the areas of sustainability, resilience, disaster risks, inequality, security, migration and citizen engagement.

This programme aims to develop your critical understanding of, and provide practical insight into how international development works in terms of contributing to the achievement of sustainable development goals.

Topic

Water, Sanitation & Hygiene (WASH)

All audiences

Duration

4 years

Learning Outcomes

Loughborough University London is committed to helping you develop the skills and attributes you need to progress successfully in your chosen career. You will learn from a passionate faculty of leading professionals and academics in the field of sustainability and development across both the Water Engineering and Development Centre (part of the School of Architecture, Building and Civil Engineering) and from across several institutes in the London School.

Climate Resilient and Inclusive WASH

Join the University of Technology Sydney's Institute for Sustainable Futures' free, self-paced online course on climate change and inclusive water, sanitation and hygiene (WASH). Gain a foundational understanding of the links between WASH, gender equality, disability and social inclusion (GEDSI), and climate change, and build your capacity to address climate impacts in WASH programming and service delivery at sub-national and local levels.

Topic

Water, Sanitation & Hygiene (WASH)

Format:

E-Learning

Provider:

WFW, Australian Aid, UTS

Language:

English

Course Level

Intermediate

Audience

WASH professionals

Learning Outcomes

By the end of this course, you will be able to:

- Introduce key climate change and GEDSI concepts;
- Evidence links between climate change, GEDSI and WASH, drawing on research and the latest thinking in the field of global environmental change;
- Trainee on practical tools to assess and respond to climate impacts on WASH in socially inclusive ways;
- Share your own thoughts and experiences on climate change, GEDSI and WASH, and hear from others

Other Ways to Keep Learning

Sanitation is a Basic Human Right

Dr. de los Reyes is a Professor of Civil, Construction, and Environmental Engineering and Associate Faculty of Microbiology. He published over fifty papers on topics relating to water treatment, wastewater and sanitation, including papers on characterizing pit latrines in peri-urban areas, trash removal from pit latrines, and desludging fecal material. Dr. de los Reyes's lab regularly collaborates with companies, universities, and government entities in Europe, Asia, and Sub-Saharan Africa. Dr. de los Reyes is a University Faculty Scholar and lead for the WaSH Cluster. See more info <https://globalwash.ncsu.edu/faculty/core-faculty/francis-de-los-reyes-iii/>
